

# SUPERSTORE SALES ANALYTICS

Final Executive Report | ApexPlanet Software Pvt. Ltd.

## Executive Summary

This report analyzes the Sample Superstore dataset containing 9,994 transactions to evaluate sales, profitability, customer segments, regions, categories and sub-categories. Total sales were \$2,297,200.86, with total profit of \$286,397.02. Technology was the leading category by sales, while the West was the strongest region. The analysis also identifies a clear profitability concern in Tables, where substantial sales were accompanied by an overall loss. These findings support more targeted growth, pricing and profitability decisions.

## Key Performance Indicators

| Total Sales | Total Profit | Orders | Customers | Avg. Order Value |
|-------------|--------------|--------|-----------|------------------|
| \$2,297,201 | \$286,397    | 5,009  | 793       | \$458.61         |

## Dashboard

# TOP 5 BUSINESS INSIGHTS

Evidence-based findings from the full 9,994-row Sample Superstore dataset.

## 1) Technology leads category sales

Technology generated \$836,154.03 in sales and \$145,454.95 in profit, making it the strongest category by sales.

## 2) West is the strongest region

The West generated \$725,457.82 in sales and \$108,418.45 in profit, leading the four regions.

## 3) Tables are a profitability concern

Tables generated \$206,965.53 in sales but recorded \$-17,725.48 in profit, showing that sales volume does not guarantee profitability.

## 4) Consumer is the largest segment

Consumer generated \$1,161,401.34 in sales and \$134,119.21 in profit, making it the largest segment by sales.

## 5) Copiers are a major profit driver

Copiers generated \$55,617.82 in profit, the highest among sub-categories; Phones and Accessories are also important profit contributors.

## Business Recommendations :

**1) Review loss-making products.** Investigate pricing, discount levels and fulfillment costs for Tables and other negative-profit sub-categories before pursuing additional volume.

**2) Prioritize high-performing markets and categories.** Protect and expand the West region and Technology category through targeted sales, retention and cross-selling initiatives.

**3) Strengthen profitability-led decision making.** Track profit alongside sales when evaluating products and promotions, and use high-profit sub-categories such as Copiers, Phones and Accessories as opportunities for focused growth.

## Conclusion

The Superstore analysis shows a strong overall sales base but meaningful differences in profitability across products, categories and regions. The strongest opportunity is to combine growth in high-performing areas with tighter control of loss-making products and discount-driven profitability risks.
